# DISCLAIMER

This presentation has been prepared by Northern Capital Resources Corporation (“NCRC” or the “Company”) and consists of written materials/slides for a presentation.

By reviewing/attending this presentation, you agree to be bound by the following conditions. No representation or warranty, express or implied, is made as to the fairness, accuracy, or completeness of the information, contained in the presentation or of the views, opinions and conclusions contained in this material. To the maximum extent permitted by law, NCRC and its related bodies corporate and affiliates, and its respective directors, officers, employees, agents and advisers disclaim any liability (including, without limitation any liability arising from fault or negligence) for any loss or damage arising from any use of this material or its contents, including any error or omission there from, or otherwise arising in connection with it.

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended that are intended to be covered by the safe harbour created by such sections. Such forward-looking statements include, without limitation, (i) estimates of future capital expenditures, project costs, tax rates and expenses; (ii) estimates regarding timing of future mine development, construction, operations, or closure activities; and (iii) statements regarding potential cost savings, productivity, operating performance, cost structure and competitive position. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks in the countries in which we operate, and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” to reflect events or circumstances after the date of this news release, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

Certain statistical and other information included in this presentation is sourced from publicly available third party sources and has not been independently verified.

# OVERVIEW

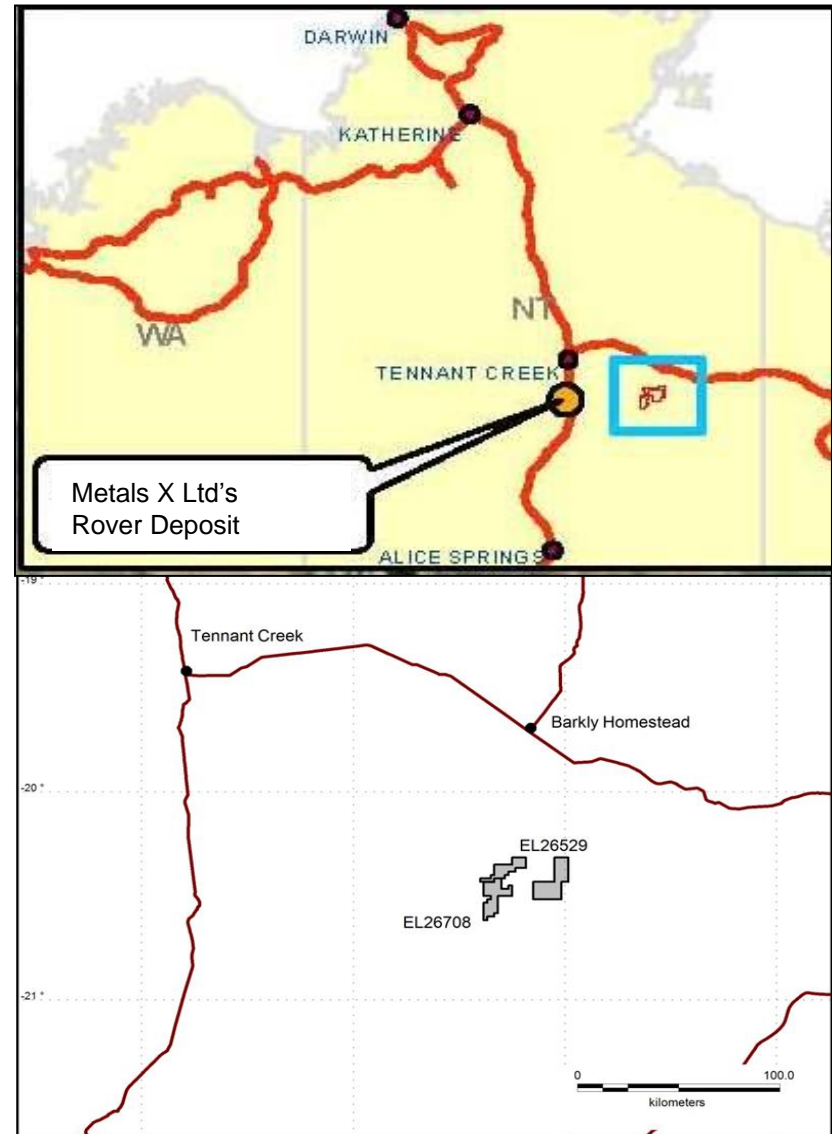

Northern Capital Resources Corporation (“NCRC”) is a diversified mineral explorer with its flagship Davenport gold-copper project in the Northern Territory, Australia.

- The Davenport project has potential to host high grade gold within magnetite bodies similar to the Rover 1 Iron Oxide Copper Gold “IOCG” deposit which is approximately 150km to the west of Davenport.
- Ground geophysical surveys have provided 4 drill ready targets.
- The priority target at the Area 7 prospect is potentially within 100m of surface.

# DAVENPORT PROJECT

- NCRC is earning up to an 80% interest into the Davenport Project, which is currently owned by Kettle Rose Pty Ltd.
- The Project is located southeast of Tennant Creek in the Northern Territory and comprises two granted exploration licences (EL26529 & EL26708)
- This exciting new project has potential to host high grade gold deposits related to magnetite bodies similar to the IOCG deposits being developed by Metals X Ltd near Tennant Creek.

# DAVENPORT PROJECT

- Targets are Au/Cu bearing magnetite bodies. Like Rover 1 these deposits have very strong magnetic signatures and can be very high grade Au and/or Cu.
- Metals X has defined a 1.22 Million ounce gold equivalent JORC compliant resource at its Rover 1 deposit.
- Assessment of geological data by NCRC concluded that the Davenport project area is prospective for Rover-style Au-Cu-Bi mineralisation.
- The magnetite bodies that host the Rover Field deposits are in part located in the basal part of the Ooradidgee Group which also occur in the Davenport project area.

Magnetics over the Rover 1 deposit

# DAVENPORT PROJECT

- A detailed data review in 2011 highlighted ten magnetic targets of potential Rover style in rocks of the Ooradidgee Formation.
- High resolution ground magnetic surveys were undertaken in 2012 over the identified targets. The results were modeled and four targets were prioritized for drill testing (image right).

Drilling Target

Exploration Licence

# DAVENPORT PROJECT

- The modeling indicates the top of the magnetic body at the Area 7 prospect to be approximately 80m below the surface.
- Area 7 is comparable in size to the Rover 1 magnetic anomaly. The detailed ground magnetic data suggests that multiple ironstone bodies may be present, a situation which is also known to occur at Rover 1.

Ground Magnetic Survey over Area 7

# DAVENPORT PROJECT – FUTURE PROGRAM

- NCRC plans to drill test the magnetic anomalies at Area 7 as a priority followed by the other 3 target areas.
- Drilling can commence after submission and approval of a Mining Management Plan which is currently underway.
- An Aboriginal Areas Protection Certificate has been granted allowing drilling to commence upon approval of the Mining Management Plan.

## **Mr Joseph Gutnick**

**FAusIMM, FAIM, MAICD**

**President, Chief Executive Officer and Chairman of the Board**

Mr Gutnick is a leading mining industry entrepreneur. He is the President and Chief Executive Officer of a number of listed public companies in the mining and exploration sector in both Australia and North America. Mr. Gutnick was responsible for overseeing the discovery, development and operation of the world class Plutonic, Bronzewing and Jundee gold mines in Australia. Mr Gutnick is a Fellow of the Australasian Institute of Mining and Metallurgy, a Fellow of the Australian Institute of Management, a Member of the Institute of Company Directors in Australia, and was a Director of the World Gold Council. Mr Gutnick was awarded the prestigious Diggers award at the 1997 Diggers and Dealers Industry Awards.

## **Dr David S Tyrwhitt**

**PhD(Geology), BSc(Hons) Geology, FSEG (USA), FAusIMM**

**Non-Executive Director (Independent)**

Dr Tyrwhitt has more than 45 years experience in the mining industry. He is currently a Director of five listed public companies in the mining and exploration sector. He worked for over 20 years with Newmont Mining Corporation in Australia, South East Asia and the United States. During this time, he was responsible for the discovery of the Telfer Gold Mine in Western Australia. He was Chief Executive of Newmont Australia Limited between 1984 and 1988 and Chief Executive Officer of Ashton Mining Limited between 1988 and 1991. Ashton was the part-owner of the Argyle Diamond Mine, the world largest diamond bearing lamproite. He established his own consultancy in 1991 and worked with Normandy Mining Limited on a number of mining projects in South East Asia

# SENIOR MANAGEMENT

**Mr Craig Michael**  
**BSc (Geol), B.Sc (Hons), MAusIMM,**  
**Executive General Manager**

Mr Michael has over 15 years experience as a geology professional in the mining and resources industry. He is currently Chief Executive Officer of Paradise Phosphate Ltd, and Executive General Manager of Merlin Diamonds Limited, and Top End Uranium Ltd. His previous work was with Oxiana Ltd, an international mining company with operations in South East Asia and Australia, where he was based at the Sepon Copper Gold Project in Laos for 4 years.

**Mr Peter Lee**  
**B Bus CA FCIS MAICD**  
**Chief Financial Officer & Secretary**

Mr Lee has over 30 years of experience in the accounting, company secretarial and commercial fields both in Australia and overseas. Mr Lee has been involved in the development and introduction of a range of corporate issues including registration of several companies in the United States, chairing due diligence committees, preparation of prospectuses, project management, preparation of annual reports, and organisation and control of annual general meetings. Prior to joining the Company, he spent six years with Price Waterhouse in Melbourne and Papua New Guinea.
